Pump Calibration

Factory Calibration

Controller Settings screen

Controller Settings					
Pump Calibration	Active Calibration Perform 10.07 pls/fl oz				
Rate Response Warning Error Threshold 30 %	Flow Monitor Warning Error Threshold 25 %				
	× ×				

number found on pump speed sensor, pulses/10 fluid ounces, divide by 10 and enter number, once entered, number should not be changed

Perform Calibration

pump will not run until calibrated, calibrate at beginning of season and when repairs are made

Rate Response Warning

Error Threshold and Error Delay

duration and error allowed before alarm is displayed

Flow Monitor Warning

Error Threshold

percentage of perceived application error allowed before displaying flow sensor warnings

Enable Warning

option of displaying Flow Monitor Warning

<u>Ag Leader</u> DirectCommandTM <u>Technology</u> Direct Injection

To start the Field Operation Wizard and load a configuration:

Configuration

Start Field Operation

To view run screen:

28% UAN

Product Control Toolbox

To change values shown on Product Tab and in Product Control Toolbox, go to the next page where the Rate Control Settings screen is explained.

Target Rate

desired amount of product to apply

gal/ac

<u>0</u>1

Actual Rate

actual rate of product being applied as determined by the flow sensor

Product in Tank

Target Rate #1 & #2

preset application rates that allow a quick change between rates

R

2/3

Manual Valve Control

allows operator manual control of valve

Prescription

allows rates to be determined by a loaded prescription

Up and Down Arrows

allow rates to be adjusted manually

Settings button

opens Rate Control Settings screen (explained on next page)

Ag_Leader [®] DirectCommandTM *Technology* Direct Injection

To access the Rate Control Settings window:

Rate Control Settings					
Rate Control	Containers				
Chem 1 Rate 1:	R	ate 2:	Increment:	Minimum Flow:	Rx
10.00		15.00	2.00	5 gal/min 📗	()
Chem 2 Rate 1:	R	ate 2:	Increment:	Minimum Flow:	Rx
20.00		25.00	2.00	5 gal/min 🗐	(

Rate 1 and Rate 2

allows operator to set desired target rates

Increment

values when using up and down arrows in the Product Control Toolbox

Prescription

press to load a map-based prescription file

Minimum Flow

used to maintain a consistent spray pattern, calculate using tip chart. Lowest operating PSI/nozzle x number of nozzles=minimum flow
